---

Elevens namn och klass/grupp

35. In these questions, all the figures have been scaled down. (4/5/5)  
You must solve the tasks without measuring with a ruler.

- a) What is the area of the rectangle?  
*Show your working.*

- b) The perimeter of a pentagon with sides of equal length is 145 cm.  
How long is one of its sides?  
*Show your working.*

- c) What is the area of the pink figure?  
*Show your working.*

- d) The yellow area is  $184 \text{ cm}^2$ .  
How long is the side  $x$ ?  
*Show your working.*

- e) What is the value of  $x$ ?  
*Show your working.*

Figure A, rectangle

Figure B, equilateral triangle

- f) The perimeter of figure A is 180 cm. How large is the perimeter of figure B if the value of  $x$  is the same in both figures?  
*Show your working.*

- g) Robin says that Figure B always has the largest perimeter since the value of  $x$  is the same in both figures. Is Robin right?  
*Explain your answer.*
